The Path is Made by Walking: Diverse Paths to Science Fuel Creativity and Help Communities

Rebecca Calisi Rodríguez, PhD
Assistant Professor of Neurobiology, Physiology, and Behavior, UC Davis

About the Speakers
Rebecca Calisi Rodríguez is an Assistant Professor of Neurobiology, Physiology and Behavior at UC Davis. She studies how the brain controls sexual behavior and reproduction, and how stress can affect these processes. However, being a scientist and professor were not originally her intended path. Hear about Calisi Rodríguez’ non-traditional journey into research, and how her love of family, community, and diversity inspires her to do what she does.

About the Series
Leading and Breaking Barriers is a dynamic speaker series promoting participation in undergraduate research. With outstanding, diverse speakers from academia and industry, the Leading and Breaking Barriers speaker series will share stories and practices of leadership innovation in STEM fields to inspire students to discover research, and to overturn stereotypes and misperceptions about what research is and who can participate in it. The series kicks-off with the Chancellor and Leshelle May’s talk, “Breaking Barriers in a Big Way in Engineering, Industry, and Higher Ed.”

MONDAY 22
January 2018
4:10-5:00 pm
MPR, Student Community

RSVP is expected for each talk. Events are open to everyone – students, staff, faculty, and the community.
